### Project Description: -

Online leasing is a tool that can be used for smaller-scale leasing transaction for capital goods (including vehicle > 3.5t) and commercial vehicles up to 3.5t and it is intended for corporate client. It is an unified application for an internal employee and external customer with respective data access capabilities. This application enables smooth journey for an employee or customer from creating leasing offer to actual lease contract through multilevel approval and notification process. It also supports tracking and approval of multiple payment, insurance, and object location of the leased product.

### Role and Responsibilities: -

- Understand and enhance the product as per business requirements.
- Design, development, and deployment** of REST webservices and web pages.
- Perform **bug fixing** and **unit testing**.

### Work: -

- Modernized an existing feature, Including a redesign of backend and migration of code into the **Spring Boot**.
- Automated the flow to update database Daily and Monthly through **Scheduler Service**.
- Developed **Modularized Spring Boot** component, which allowed to easy code management.
- Built end to end **Rest API** which includes creation of Service, Repository, Helper, and Mapper.
- Developed the web client to consume **Soap Services**.
- Implemented the Email Notification service to send notifications.

- Intern**

*Cognizant Technology Solutions India Pvt. Ltd, Pune.*

*Dec-2019 to June-2020*

Role: **Java Full Stack developer.**

Technology: **Java** (Spring Boot), **TypeScript** (Angular).

Project: **Green Banking.**

Work: - Worked as solo Developer on **inhouse project of Green Banking.**

*Location: Hinjewadi, Pune*

## Professional Summary

- 2.10+ years of Application Development experience in Java.
- 6 months of internship experience.
- Good knowledge and working experience in Core and Advance Java, Spring-boot, Hibernate, Spring, JPA, Micro services, Angular, Jenkins.
- Work on database platform, Oracle, SQL server and My SQL while development of application.
- Involved in end-to-end development of application and software Testing.

## Technical Skills

Backend: **Java [Core, Advance]**

Frameworks: **Spring Boot, Spring, JPA, Hibernate**

UI: **Angular2+, HTML, CSS, JavaScript.**

Database: **MySQL** or **SQL Developer.**

Application

Software's: **IntelliJ IDEA, Eclipse, VS Code.**

Other: **Jenkins, GIT, SonarQube, Docker, Kafka**(producer/consumer). Also have Knowledge of Logstash, Elastic Search, Kibana. AWS (RDS, ECS, S3, EC2) used all service for my project.

## Education

BE	Sinhgad Institute of Technology, Lonavala	Savitribai Phule Pune University	8.44	2020
HSS	M. V. Jr College of Science	State Board	78.77	2016
SSC	P. V. Aary Vidhaylaya	State Board	86.60	2014

## Domain Skills

- Knowledge about Corporate Leasing.
- Certificate of completion of course “Complete Retail Banking Training” from Udemy.
- Certificate of completion of course “Digital Banking Masterclass” from Udemy.

## Personal Project

- **Tweet-App** :-

**Objective** :- To build and deploy an application which is stable, faster and can handle all uncertainties with proper error message and status code.

**Git link** :- <https://github.com/jaydatt98/tweetapp>

**Application link** :- <http://tweet-app-ui-jaydatt.s3-website-us-west-1.amazonaws.com/home>

**Swagger link** :- <http://13.57.179.254:9191/swagger-ui/index.html#/>

**Details** :-

- Implemented **custom exception handling with error code**.
- Implemented **AOP for logging**.
- Implemented **open api for documentation** of resources.
- Implemented **kafka producer** for delete functionality.
- **Configured Logstash, Elasticsearch, Kibana for logging purpose**.
- Used java 8 features like **Optional class, Stream api and Lambda Expression**.
- Built DTO object for Request and Response.

**Technology** :- Angular, Java, Spring Boot, MySQL. Kafka, Open API (swagger), Logstash, Elasticsearch, Kibana.

## Internship Training Projects

- **Air-Ticket-Reservation** :-

**Description**:-

This project is web application which facilitates the online booking of flights. This application allows Admin and customer to perform different operations like Flight Search, Book ticket, cancel flight, Edit details etc. This project final objective to develop an application which can be used to manage customers and flight details.

**Technology**:- Database: MySQL, Scripting: JavaScript, Java : Java, Spring MVC, Spring Boot.

## Declaration

I hereby declare that the particulars given here are true to the best of my knowledge and belief.

Date:

Place: Pune

Yours sincerely,  
Jaydatt T. Dhorsinghe.
